

BRD's Forever Farm

Family owned and operated BRD's Forever Farm is nestled on 116 acres of beautiful farmland in the heart of the Amish Trail where we specialize in Grass-fed Angus Beef and Pastured Heritage Pork. Our beef cattle and hogs graze on pastures of alfalfa, clover and orchard grass and have year round access to our spring fed stream. All of our animals are humanely raised and are never given growth hormones or antibiotics unless medically necessary. The low stress environment of Forever Farm allows our animals to grow as they were intended— not the way of today's commercial production farms. We are "Beef Quality Assurance" certified renewing our commitment to beef quality production from our family to yours. While our process takes a little longer, you will find our meat to be exceptionally full of flavor, lean and so much different than what is found in supermarkets today. See our website for locations where our products are available, including several restaurants, a minimarket and area farmers markets. As always our Beef and Pork is available at the farm by appointment.
